

# Stonebridge Wine Cellars

# Essential Elements of The Stonebridge Wine Rooms

**1. Temperature Control:** Maintain a consistent temperature between 50-59°F (10-15°C) to ensure wines age gracefully without fluctuations that can harm their quality.

**2. Humidity Management:** Keep humidity levels between 50-70% to prevent corks from drying out, avoiding air seepage into bottles that could spoil the wine.

**3. Insulation & Sealing:** Properly insulate the cellar and ensure airtight sealing to maintain stable conditions, preventing external temperature and humidity influences.

**4. Ventilation:** Proper air circulation prevents musty smells and mold, crucial for maintaining a healthy environment for wine aging.

5. Racking & Shelving: Opt for sturdy and wine-friendly racks or shelves to store bottles properly, allowing easy access and minimizing disturbance to the wines.

6. Lighting: Use low-UV lighting or consider LED options to showcase the collection without harming the wine, as UV rays can degrade it.

7. Security Measures: Install secure locking mechanisms or systems to safeguard valuable collections and ensure controlled access.

8. Monitoring & Control Systems: Utilize technology for temperature and humidity monitoring, allowing remote control and alerts for any deviations.

9. Wine Inventory Management: Implement a system for tracking wine inventory, facilitating organization and easy access to specific bottles.

10. Aesthetic Design: Blend functionality with aesthetics, considering the cellar's design, materials, and ambiance to create an inviting space for both storage and enjoyment.

*“Each element plays a crucial role in maintaining optimal conditions and preserving the quality of wines in the cellar.”*

- **Basement:** Utilize the naturally cooler and spacious basement to create an expansive wine cellar, offering room for a growing collection and potential entertainment space.
- **Pantry:** Transform the pantry into a convenient and stylish wine storage area adjacent to the kitchen, ensuring easy access while optimizing space with custom racks and temperature control.
- **Guest Room:** Convert a guest room into a dual-purpose space by integrating a sleek and functional wine cellar, blending storage seamlessly with the room's design.
- **Hall Closet:** Repurpose a hall closet into a compact yet efficient wine storage area, optimizing space with customized shelving and temperature control.
- **Under the Stairs:** Maximize under-stair space for a charming and functional wine cellar, utilizing creative design while making use of an otherwise unused area.
- **Dedicated Custom Space:** Create a bespoke wine cellar in a dedicated space, allowing complete customization, showcasing design elements, and providing ample room for storage while elevating the overall ambiance of your home.

Thank you  
for choosing Stonebridge for your  
wine room/cellar needs.
